

Environmental Policy

Cressall Resistors Ltd recognises its responsibility to meet the requirements of its customers without unnecessary damage to the environment.

We will carry out our activities in line with sound environmental practises and in ways that reduce pollution entirely. The associated impacts will aim to be reduced with the utilisation of the waste hierarchy, where practicable.

Through a programme of training, monitoring and targeting, we will as far as possible: -

- *Minimise the generation of wastes*
- *Reduce uncontrolled atmospheric emissions*
- *Minimise our use of energy and natural resources*
- *Comply with all relevant environmental legislation as well as 'other' requirements*
- *Look to identify all significant environmental aspects and continually improve*
- *Communicate the Environmental Management System throughout the workplace to all employees*

These commitments will be the basis for improving and setting objectives and targets against the company's environmental performance, which will be reviewed at regular & specified intervals.

The policy has the support of the staff and Management of Cressall Resistors Ltd.

Simone Bruckner

Managing Director
